**The Harvard Classics in a Year**-Amanda Kennedy
2014-10-08 The Harvard Classics in 365 Days aims to provide a whirlwind tour of classic literature. By reading for just 15 minutes a day throughout the year, you can discover text from “twelve main divisions of knowledge” including History, Poetry, Natural Science, Philosophy, Biography, Prose Fiction, Criticism and the Essay, Education, Political Science, Drama, Voyages and Travel and Religion. Based on Dr. Eliot’s “reading guide” for The Harvard Classics, a complete
chapter of reading material is included for each day of the year (even February 29th, in case you are reading during a Leap Year): "These selections assigned for each day in the year as you will see, are introduced by comments on the author, the subjects or the chief characters. They will serve to introduce you in the most pleasant manner possible to the Harvard Classics. They will enable you to browse enjoyably among the world’s immortal writings with entertainment and stimulation in endless variety.." Each reading is framed by an introduction, a context in which the text can be read and understood, often with insightful information about the author, it's wider history, or why that particular selection is appropriate reading for that day.

The 48 Laws of Power - Robert Greene 2000-09-01
Amoral, cunning, ruthless, and instructive, this multi-million-copy New York Times bestseller is the definitive manual for anyone interested in gaining, observing, or defending against ultimate control - from the author of The Laws of Human Nature. In the book that People magazine proclaimed “beguiling” and “fascinating,” Robert Greene and Joost Elffers have distilled three thousand years of the history of power into 48 essential laws by drawing from the philosophies of Machiavelli, Sun Tzu, and Carl Von Clausewitz and also from the lives of figures ranging from Henry Kissinger to P.T. Barnum. Some laws teach the need for prudence (“Law 1: Never Outshine the Master”), others teach the value of confidence (“Law 28: Enter Action with Boldness”), and many recommend absolute self-preservation (“Law 15: Crush Your Enemy Totally”). Every law, though, has one thing in common: an interest in total domination. In a bold and arresting two-color package, The 48 Laws of Power is ideal whether your aim is conquest, self-defense, or simply to understand the rules of the game.

**Influential Thinkers of the Renaissance**-Niccolo Machiavelli 2005-12-01
[T]o slaughter fellow-citizens, to betray friends, to be devoid of pity, honor, and religion, cannot be counted as merits, for these are means which may lead to power, but which confer no glory.-from The Prince

Here, in one volume, are three of the greatest works of the Renaissance, artifacts of the flowering of learning and culture in Europe that gave birth to our modern world: . The Prince, by Niccolo Machiavelli (1469-1527), is one of the most significant-and most remarkably misunderstood-essays on government ever written. A product of the political intrigue of Florentine Italy, it is a stunning commentary on ambition and the uses and misuses of power.. Utopia, by Sir Thomas More (1478-1535), is a startling work of social and cultural philosophy that may also, with its fictional conceit, be considered a forerunner of the novel.. Ninety-Five Theses, by Martin Luther (1483-1546), ushered in the religious upheaval of the Reformation. A searing indictment of the corruption
in the Catholic Church, Luther's writings laid the foundations for the diverse religious culture in which we live today. With its introductory notes and commentary, this edition, first published in 1910, is a compact course in humanities and cultural history, and essential reading for any liberal education.

**English Poetry** - Geoffrey Chaucer 2010-04-01

Originally published between 1909 and 1917 under the name "Harvard Classics," this stupendous 51-volume set-a collection of the greatest writings from literature, philosophy, history, and mythology-was assembled by American academic CHARLES WILLIAM ELIOT (1834-1926), Harvard University's longest-serving president. Also known as "Dr. Eliot's Five Foot Shelf," it represented Eliot's belief that a basic liberal education could be gleaned by reading from an anthology of works that could fit on five feet of bookshelf. Volume XL is the first of three volumes that ambitiously survey half a millenium of poetry in the English language. Almost 300 works by more than 75 authors in this volume alone span the 14th through 18th centuries, and include:

- Richard Lovelace: "To Lucasta, on Going to the Wars" [ Andrew Marvell: "Love Will Find Out the Way" [ John Dryden: "Song for St. Cecilia's Day" [ Alexander Pope: "On a Certain Lady at Court" [ Thomas Gray: "Elegy" as well as traditional ballads and numerous works by writers who remain anonymous to us today. Useful explanatory footnotes explain the meanings of obsolete and rare words, as well as those in...

Biomass for Bioenergy and Biomaterials - Nidhi Adlakha 2021-10-22

Biomass for Bioenergy and Biomaterials presents an overview of recent studies developed specifically for lignocellulose-based production of biofuels, biochemicals, and functional materials. The emphasis is on using sustainable chemistry and engineering to develop innovative materials and fuels for practical applications. Technological strategies for the physical processing or biological conversion of biomass for material production are also presented. FEATURES Offers a comprehensive view of biomass processing, biofuel production, life cycle assessment, techno-economic analysis, and biochemical and biomaterial production. Presents details of innovative strategies to pretreat biomass. Helps readers understand the underlying metabolic pathways and identify the best engineering strategies for their native strain. Highlights different strategies to make biomaterials from biomass. Provides insight into the potential economic viability of the biomass-based process. This book serves as an ideal reference for academic researchers and engineers working with renewable natural materials, the biorefining of lignocellulose, and biofuels. It can also be used as a comprehensive reference source for university students in metabolic, chemical, and environmental engineering.

How to Do Things with Words - J. L. Austin 1975-04-15

John L. Austin was one of the leading philosophers of the twentieth century. The William James Lectures presented Austin’s conclusions in the field to which he directed his main efforts on a wide variety of philosophical problems. These talks became the classic How to Do Things with Words. For this second edition, the editors have returned to Austin’s original lecture.
notes, amending the printed text where it seemed necessary. Students will find the new text clearer, and, at the same time, more faithful to the actual lectures. An appendix contains literal transcriptions of a number of marginal notes made by Austin but not included in the text. Comparison of the text with these annotations provides new dimensions to the study of Austin's work.
